Main QUESTION	Sub-Topic within question area *Needs title changes for most
When should I be worried?	*E.g. there may be several sub-topics under each main 'question'. Each row represents one subtopic*
My child is getting frustrated	
What is Speech And Language Therapy?	
My child isn't talking yet	
My child's speech is hard to understand	

I’m not sure if my child understands me	
How can I support key areas of my child’s language development	
My child is learning English as an additional language.	
Why is reading so important?	
Is it ok for my child to have a dummy?	
Will an iPad affect my child’s communication?	

My child can't tell me what's wrong or what's happening. Why can't my child make themselves understood easily?	
Specialist SALT areas	

Example: Myth Vs Fact - We want this to be a type of 'game'

1. WHEN SHOULD I BE WORRIED?

Early Years

MYTH 1: If my child isn't talking yet, something must be seriously wrong.
FACT: There are lots of reasons why children may be later to talk. A delay doesn't tell us the reason, but it does mean it is worth looking at their communication development as a whole.

MYTH 2: They're probably just a late talker, they'll catch up when they're ready.
FACT: Some children do catch up, but others continue to need support. We can't always tell which children will catch up just by waiting, so it's okay to ask for advice if you're concerned.

MYTH 3: The number of words my child says is the main thing I need to watch.
FACT: Words are only one part of communication. Understanding language, using gestures, interacting and sharing attention are important too.
